WEB DESIGNING WORKSHOP

Workshop at VBIT:

The main objective of this workshop is to create awareness among the students about the prevailing web designing technologies and also provoking the thought that web designing is very much simple and that one need not actually learn a programming language in order to develop a website.

A total of 155 students participated in the workshop conducted on web designing. The workshop was conducted in 4 sessions i.e. 2 sessions a day out of which the 1st session was a theory session. Both theory and practical sessions were conducted. Theory sessions were carried out on Joomla and Drupal. Students were also helped in gaining practical knowledge through the practical sessions. This is where the student actually gets a chance to apply what he/she has learnt.
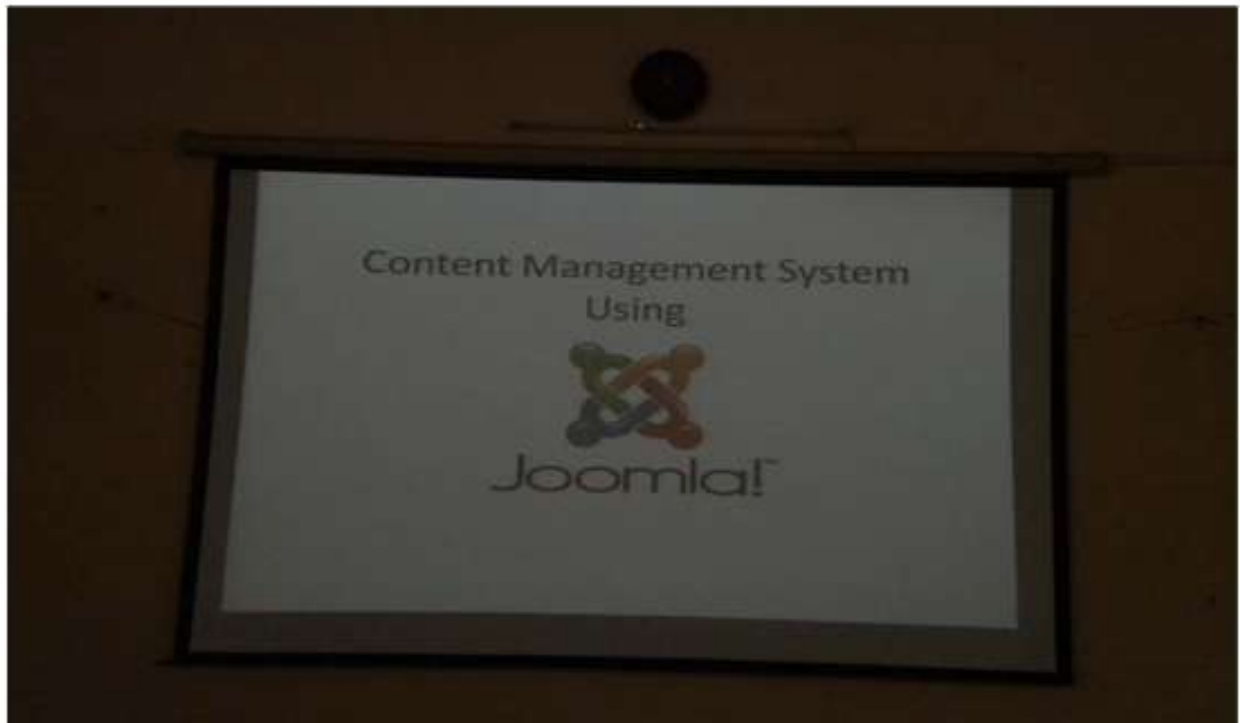

It was a tremendous response from all the students of B.Tech. Students from other colleges also participated in large number.

The topics which were covered are as follows:

- Joomla!

- Drupal

- HTML

- PHP

- How is Joomla different from others.

The following pictures are taken during the workshop:

WEB DESIGNING WORKSHOP

The event was a grand success as we received an overwhelming response from the students and also that the students have gained confidence that they have learnt something productive.

We are looking forward to have many such quality events in the coming future.

IEEE-VBIT SB WIE Society.

WIE:

WIE envisions a vibrant community of women innovating the world of tomorrow. It not only promotes women but also supports them in their academic and professional careers. It is associated with worldwide, multidisciplinary community of engineers, scientists and educators. It throws light on how women are making a lasting impact on the engineering field.

Xylyx-2009:

In the national level technical fest XYLYX'09 which was conducted under the banner of IEEE, an event was introduced exclusively for girls for the first time since XYLYX had been coined. This event in turn was conducted under IEEE WIE chapter wherein all the WIE coordinators from all the colleges in and around the city had gathered and had a truly technical conference which enlightened girls' inherent talent in technology, which turned out to be a truly successful event in the fest.

Xylyx-2010 had taken this step ahead and introduced a new event under it, exclusively for girls, under the banner of IEEE-WIE.

The event is christened Techno Glee, celebrating the joy of technology.

Techno Glee:

It was an "on the spot" paper presentation competition held on the second day of the fest i.e., 27th march, 2010, wherein the participants were given a technical topic on the spot they had to prepare a power point presentation on that particular topic in the given time limit. The participants were judged on their thought orientation, communication skills and presentation skills. This event aimed at bringing out the talent of women in engineering field into light.

Apart from this competition, there were guest lectures by a scientist, Dr.D.Shailaja from IICT on "women in technical field" and another by a renowned orator Dr.Kanaka Durga. The response to this event was overwhelming .The winner was awarded with the IEEE membership for the next academic year.

The pictures of the event are below:
